ondansetron (1compartment): Optimizer Failed, No Curve Fit

oxazepam (1compartment)

pentachlorophenol, purified (1compartment)

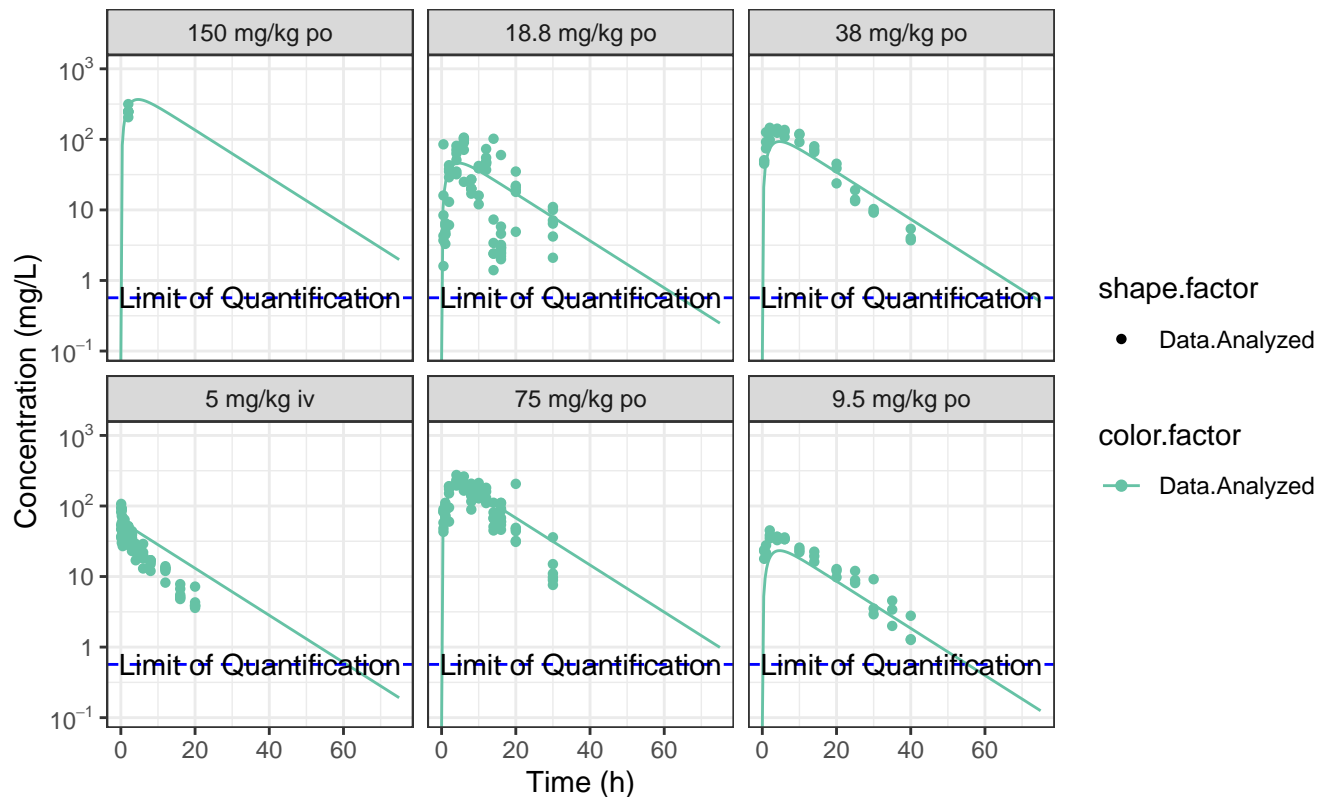

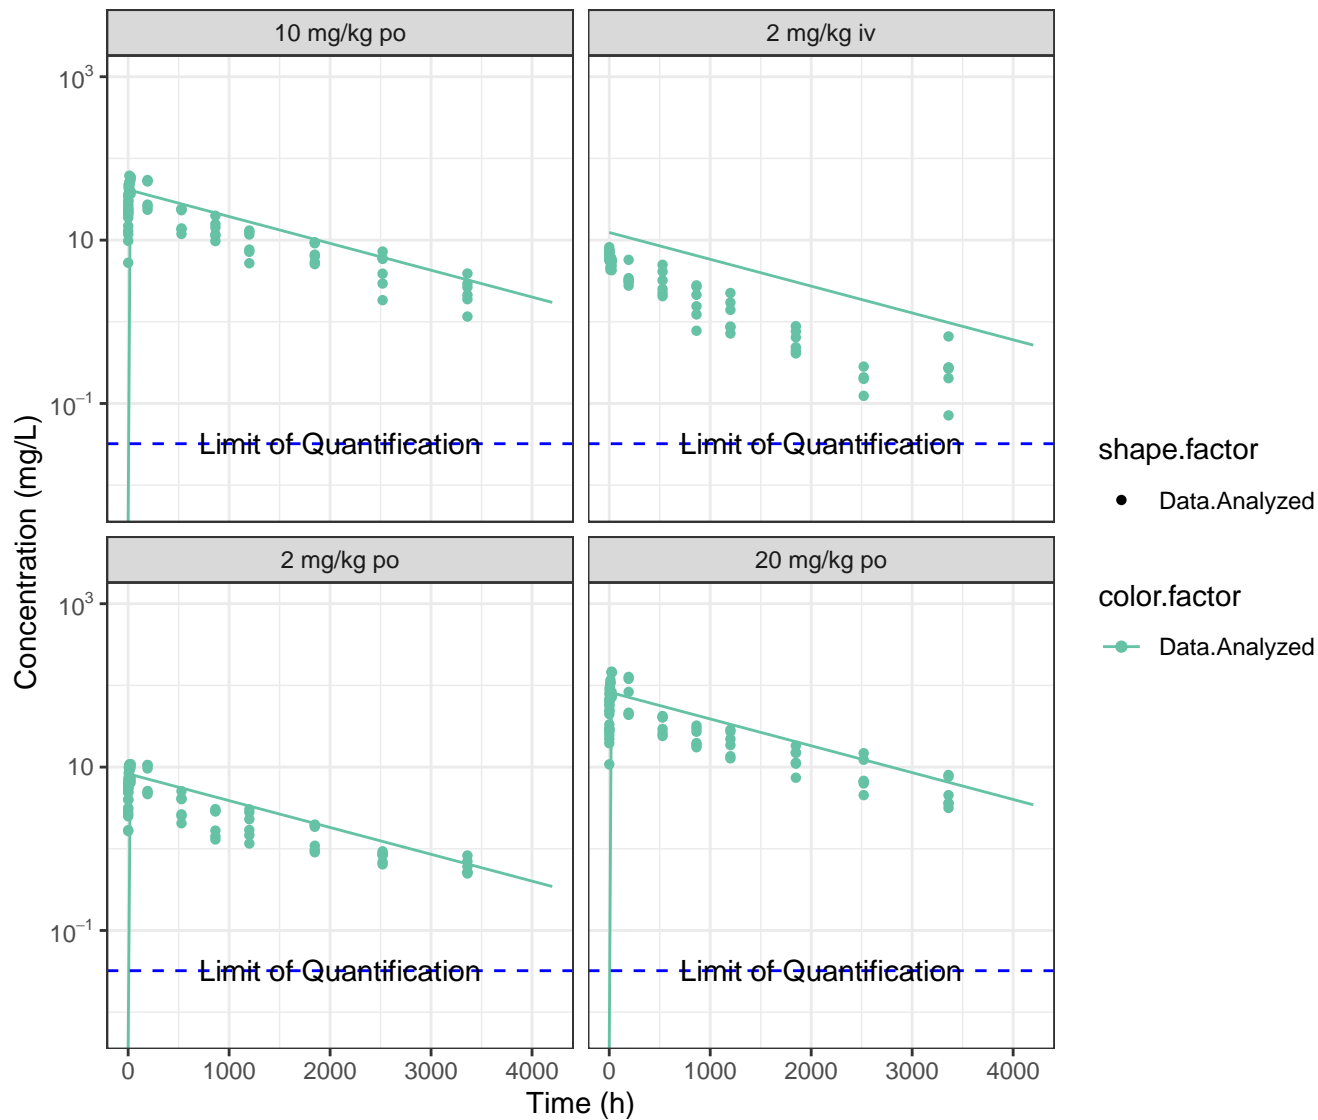

Figure 1 consists of two side-by-side scatter plots showing plasma concentration (ng/ml) versus time (h) for two different dosing regimens: 0.2 mg/kg iv (left) and 1 mg/kg po (right). Both plots include a dashed horizontal line representing the Limit of Quantification (LOQ) at approximately 0.5 ng/ml. The left plot shows data points for the 0.2 mg/kg iv dose, with concentrations starting around 1.5 ng/ml and declining over time. The right plot shows data points for the 1 mg/kg po dose, with concentrations starting around 1.5 ng/ml and declining over time. Both plots show a rapid decline in concentration over time, with a dashed line indicating the Limit of Quantification.
