The figure consists of two side-by-side line graphs. The left graph is titled '1 mg/kg iv' and the right graph is titled '5 mg/kg po'. Both graphs have 'Time (h)' on the x-axis (0 to 75) and 'plasma' concentration on the y-axis. The y-axis has a label '192' at the top. In both graphs, the concentration starts at a high level (around 192 mg/kg) at time 0 and drops rapidly to a baseline level (around 10 mg/kg) within 25 hours. The data points are connected by lines, and there are error bars for each point.
